

The Role of the Fire Services Department

The Licensing Authority, i.e. the Leisure and Cultural Services Department (LCSD), will not issue any Places of Amusement Licence (PAL) until the applicant has complied with among others, all requirements imposed by the Director of Fire Services. Upon fully compliance with all fire safety requirements, LCSD will be notified in writing by FSD.

If there are installation / alteration works on the mechanical ventilating system of the premises, and the process involves the passage of any air duct through any floor, ceiling or wall, that is from one compartment to another, so that installation / alteration of fire damper(s) within the premises is necessary, the Building (Ventilating Systems) Regulations (Cap.123J) shall apply, and a Letter of Compliance (Ventilating System) issued by the Ventilation Division of FSD will be required.

Fire Safety Requirements

- Application for a Places of Amusement Licence (PAL), **in prescribed form** together with proposed layout plans, shall be submitted to the respective Licensing Section of LCSD for processing. If the application is acceptable in principle, LCSD will refer the application to the respective Regional Office (RO) of FSD for formulation of fire safety requirements. The respective RO will make direct contact with the applicant to arrange for site inspection where necessary.
- To avoid delay, the applicant should ensure that all information required for the application has been adequately provided and the actual layout conforms to the proposed layout plans.
- For each individual application, FSD will consider whether the premises is suitable for the purpose of places of amusement. If the premises and the proposed layout are considered suitable for such purpose, detailed fire safety requirements will be formulated and issued to the applicant through LCSD. If the premises and/or the proposed layout are/is considered unsuitable for such purpose, a memo stating the reasons for objection will be issued to LCSD. **General fire safety requirements have been uploaded to FSD's home page for the reference of applicants.**

<http://www.hkfsd.gov.hk/home/eng/source/licensing/premises.htm>

- The applicant is required to obtain the following certificates or documents to prove compliance of fire safety requirements:-
 - (a)* a Certificate of Compliance # (FSI/314A, FSI/314B or FSI/314C) and/or a Certificate of Fire Service Installations and Equipment # (FS 251) issued by a registered fire service installation contractor;
 - (b)* if self-contained battery type emergency lighting unit is to be installed, the test report or catalogue of the emergency lighting unit with valid Certificate of Fire Service Installations and Equipment (FS251); and
 - (c)* if PU foam filled furniture is used, the invoice from the manufacturer / supplier indicating that the PU foam filled furniture items meet the relevant flammability standards, and a copy of the test certificate issued by a testing laboratory accredited to conduct tests according to specified standards. The test certificate should bear the supplier's / manufacturer's company seal for authentication purposes, and PU foam filled furniture items meeting the specified standards should bear appropriate labels.
- Applicants or their authorized representatives should, upon completion of all works required, inform the respective RO by phone, email or in writing so that follow-up inspection can be arranged.
- If non-compliance with fire safety requirements is spotted during the follow-up inspection, the subject RO will inform LCSD in writing of any remedial works required, and arrange for further follow-up inspection after the applicant has notified that all the requirements have been met. If a place of amusement is found to be in operation without a valid licence, LCSD will be informed to take appropriate action.
- If the follow-up inspection has proved that all fire safety requirements have been complied with and the layout of the premises conforms to the

approved plan, LCSD will be notified in writing by FSD.

Explanatory Notes

- (a)* *These certificates are issued by registered fire service installation contractors. The purpose of these certificates are to ensure that following the decoration of the premises, the fire service installations (FSI) provided for the building are still in efficient working order.*

If there is a need to alter or add any fire service installations and equipment in the premises, the applicant should appoint a registered fire service installation contractor to carry out the work. The registered fire service installation contractor should submit a copy of the certificate (FSI/314A, FSI/314B or FSI/314C as appropriate) together with the relevant FSI plan to the Director of Fire Services. Upon completion of the work, the registered fire service installation contractor should inspect and certify the installations, and submit a copy of the Certificate of Fire Service Installations and Equipment (FS251) to the Director of Fire Services. A list of registered fire service installation contractors is available for inspection at the ROs and all fire stations as well as the following web page of FSD: www.hkfsd.gov.hk/home/eng/cert.html.

- (b)* *The purpose of this test report or catalogue is to enable FSD to check whether the self-contained battery type emergency lighting unit installed meets the specified standards.*
- (c)* *The purpose of this invoice and test certificate is to enable FSD to check whether the PU foam filled furniture used meets the specified standards.*

How to Obtain a Letter of Compliance (Ventilating System)

- The Letter of Compliance (Ventilating System) is issued by the Ventilation Division of FSD. The purpose of this letter is to certify that the ventilating system installed in the Places of Amusement has been inspected, and complies with the fire safety provisions stipulated in the Building (Ventilating Systems) Regulations (Cap.123J), and the fire safety requirements on mechanical ventilating systems issued by FSD.

- The applicant does not need to apply directly to FSD for a Letter of Compliance for the ventilating system of the premises under application. If the applicant has indicated in his/her application that a mechanical ventilating system is to be installed at the premises, fire safety requirements on mechanical ventilating systems will be issued to the applicant directly by FSD.
- Before the ventilation works commences on site, the applicant is required to submit three sets of ventilation / air-conditioning layout plans directly to LCSD. The LCSD will refer the plans to the Ventilation Division of FSD for processing.
- When all ventilation installation works have been completed and full compliance with fire safety requirements confirmed, the applicant should fill out a prescribed form # “Report of Completion on Ventilating System” (Vent/425) and return the original copy to the Ventilation Division, so that initial inspection can be arranged.
- If the ventilating system does not comply with fire safety requirements, the Inspection Officer will, during inspection, advise the applicant or the appointed representative of any remedial works required. A formal list of non-compliance works will be issued to the applicant by the Ventilation Division within 7 working days after inspection. After rectifying the defects of the ventilation installation, the applicant is required to report compliance by submitting a completed prescribed form (Vent/425) to the Ventilation Division once again. The procedure is identical to that of initial inspection.
- After confirmation of compliance with all fire safety requirements, a Letter of Compliance (Ventilating System) will be issued to the applicant direct with a copy of the letter to the LCSD.
