

Name:	HKFSD Mobile Application — Campus AR Interactive Centre
Format of Activity:	Talk, Interest Group, or any other format preferred by schools to match their need
Description of Activity:	<p>To enhance the public’s knowledge of fire safety and ambulance aid, the Hong Kong Fire Services Department (FSD) has launched the "Hong Kong Fire Services Department Mobile Application" (FSD App). Members of the public can download the FSD App on a smartphone or tablet (iOS and Android systems) and access the latest information on the FSD. They can also learn more about fire prevention and ambulance aid through the built-in games.</p> <p>One part of the App is named “AR Interactive Centre”. With the technology of Augmented Reality (AR), teachers and students can make use of the cameras of their smartphones or tablets to scan specially designed images. Afterwards, such images will appear in the smartphones or tablets and simple, interesting and interactive games will begin, providing a joyful and relaxing learning experience to acquire knowledge related to fire safety and ambulance aid. Since the AR Interactive Centre makes use of interactive games and poses no limitations on literacy, it is suitable for teachers and students of all ages. Upon the successful application of the event, the staff of this Department will contact the responsible person of the applying school to discuss the activity format preferred by the school, such as FSD staff introducing knowledge on fire safety and ambulance aid to teachers or students in class by making use of the FSD Mobile App, etc. so that the format of the activity can best match the need of the school.</p>
