

FSD's "AED Anywhere for Anyone" ("AAA") Programme

The "AED Anywhere for Anyone" ("AAA") Programme of Hong Kong Fire Services Department (FSD) aims to facilitate the provision and use of automated external defibrillator (AED) in the community. FSD, in collaboration with different sectors of the community, endeavors to progressively increase the quantity of publicly accessible AEDs across Hong Kong, as well as to enhance public awareness and ability to use AED promptly in emergencies, with a view to further protecting life in Hong Kong. Information of AEDs under the Programme is uploaded to the Centralized AED Registry for Emergency (CARE) online platform established by FSD, from which citizens may obtain the locations and details of available AEDs for warranting situations. FSD also provides comprehensive and appropriate support for participating organizations and community volunteer responders. Details are as follows:

The general public can join the FSD's "AAA" programme in two ways

Register your AEDs directly on the FSD's online information platform "CARE"

Enrol to join the FSD's "AAA" programme. The FSD will provide the following support services
