

## **Interception of FSD vehicles by members of the public**

The FSD noticed some online comments aimed at instigating the public not to make way for fire appliances and ambulances on duty, by alleging that the vehicles would collaborate with the Police to disperse protesters in public order events or protests.

We strongly condemn people who intercepted our fire appliances and ambulances attending all emergency services. Firefighting, rescue and emergency ambulance operations are all time-critical, and a moment's delay may cost a life. Obstructing the performance of firefighting or emergency rescue duties by fire appliances and ambulances is an act of extreme irresponsibility, as it will endanger the life and property of the public.
